

BEYONDWATER.EARTH

We exist to help solve  
the world's water crisis.

# WE MAKE WATER FROM AIR

Water Is Finite.

We only have access to 1% of the  
earth's freshwater.

50% of the earth's largest aquifers  
are being depleted.

Man made global warming is  
accelerating water evaporation and  
surface water is drying up.

文塔街

# ISSUES WE CAN'T IGNORE

Current desalination solutions like reverse osmosis waste up to  $\frac{2}{3}$  of all the water they filter.

844,000,000 people lack access to drinking water, and 2.2 million children are dying from water borne disease every year.

---

# WE ARE ON A MISSION

Beyond Water is helping the world become net producers of our most precious resource for the greater good of our communities, economies and our planet.

## The Solution Is In The Air

Only 1% of all water present in the atmosphere is enough to meet the total requirement for all of humanity.

There is SIX times as much water in the atmosphere than all of the world's rivers. All this water is **RECYCLED 40 X** per annum via the hydrologic cycle. It's a phenomenal untapped resource. **Until now.**

# PURE. SAFE. CLEAN.

- 100% Pure
- Zero waste
- Decentralised
- Scalable
- Runs Off Renewable
- Economical
- IOT Ready
- Hassle-Free Maintenance

We make 100% pure water that goes well beyond World Health Organisation standards.

Beyond Water aligns with UN Sustainability goals for clean water, sanitation and affordable, clean energy.

We work with Amazon, Google, Microsoft, US Consulates, Railways, Army, Navy, NGO's, Sanctuaries, Emergency Response and Big Industry so we can better care for our people, plants, animals and planet.

# THE IMPACT OF BEYOND WATER

## Economies

### Water Intensive Industries

- Bottling Plants
- Drinks Manufacturers
- Food Manufacturers
- Cosmetic Manufacturers
- Pharmaceuticals
- Islands in need of water supply

### Water Recycling

- Oil Refineries
- Chemical Plants
- Steel Plants
- Power Plants
- Gas Plants
- Fashion & Textiles

## Communities

### Rural Locations

- Boreholes
- Rural wells
- Outposts for Army, Navy,
- Airforce, Medical
- Humanitarian Aid Camps
- Disaster Recovery
- NGO's

### Fresh Air Cooling

- Architecture
- Building Planning
- Urban Planning
- Large Scale developments
- Smart Cities
- Railways & Undergrounds

## Planet

### Agriculture

- Livestock
- Drip Irrigation
- Hydroponics / Aquaponics
- Greenhouses
- Cold Storage
- Food Dehydration

### Conservation

- Open plains
- Game Reserves
- Wildlife sanctuaries
- Rehabilitation centres

# SUCCESS STORIES

**Water, education and entrepreneurship for over 200,000 people in India**

Collaboration with USAID to provide, clean, healthy, mineral enriched water at an affordable price while improving knowledge on water hygiene and sanitation practices

**High quality water for cancer patients & doctors**

Pure, mineral enriched water to 30,000 children, doctors and researchers.

**Serving 2 Million commuters pure water**

First railway in the world with AWG technology, providing high quality mineral enriched water at a fraction of the cost of bottled water.

# SUCCESS STORIES

Ready To Help Make  
The Difference?

Visit [beyondwater.earth](https://beyondwater.earth)

## Saving animals in the elephant corridor

Enabling “The Kenyan Waterman” to  
refill dried up water holes across the  
African Savannah.

## Making the world’s largest retailer self-sustainable

Clean water for Amazon’s largest  
campus in the world. Helping to  
deliver a 2040 net zero carbon  
commitment in line with UN Goals.
